

European Science and Society Summer School (E4S)

Deconstructing and Reconstructing Life

From classification to design

25–30 August 2008, Heidelberg, Germany

This interdisciplinary summer school is organized for **PhD students and post docs** in the life sciences, social sciences and the humanities. It will explore how new know-how and technologies emerging from the biological sciences are forcing us to re-examine our world-view, our conception of living organisms, species boundaries and the nature of life.

Around twenty students are invited with senior researchers and scholars from a range of different fields for a week of intensive communication. The main emphasis of the course will be on encouraging discussion and insights across disciplinary boundaries.

Don't miss this unique opportunity! Application deadline: 30 May 2008
